Beckley, WV, August 23, 2010 — Vaught, Inc., a healthcare consulting organization, announces the official launch of MedMatrix Solutions. MedMatrix Solutions offers complete billing and collections services for medical professionals and a variety of services such as practice management, consulting, marketing, and software. MedMatrix Solutions currently manages approximately \$15 million in billing revenue for medical professionals in southern West Virginia and Virginia.

Billing services offered by MedMatrix Solutions are different from the typical medical billing company. Christopher R. Vaught, president and CEO of Vaught, Inc. explains, "MedMatrix Solutions has been designed to be different. Unlike traditional billing companies, our services are designed around the specific needs of the practice. Our solutions are customized."

"Many times we work with providers who have invested in electronic health records and/or billing systems." Vaught says, "They are not interested in moving away from their existing system. We create interfaces that allow seamless transition to our services. There are no interruptions for the practice and no new processes to learn. MedMatrix Solutions has over 125 years of combined comprehensive billing experience among its operations manager and senior billing specialists. They are amazing."

Deborah Nolley, MS, a Psychologist located in Bluefield, WV says, "The staff is prompt in their response to any needs/questions I have. My patients have reported that the billing personnel are friendly and courteous."

Nolley also benefits from what she calls "fast and user friendly software". Customized software solutions are another way MedMatrix Solutions can assist their clients. These capabilities include EMR, EHR, medical billing software, eEligibility, scheduling solutions, and more. Many of these are at no cost to the provider.

One of the latest clients to join up with MedMatrix Solutions, Dr. J.J. Gordinho, comments, "I continue to be impressed with their level of communication and professionalism. Transition to their service was seamless and stress-free."

Dr. Michele Staton adds, "I moved back to Beckley, WV and opened my pediatric practice about a year and a half ago and Vaught, Inc. was instrumental in helping me start my practice. They covered everything including getting my business license, advertising, acquiring office space, ordering equipment, researching EMR systems, securing malpractice insurance, and much more. They have also taken care of my billing services since I opened and have recently changed the name of the billing company to MedMatrix Solutions. I would highly recommend them to anyone needing a practice management consultant or billing company."

Beginning September 1st, MedMatrix Solutions staff will also include a Certified Provider Credentialing Specialist through the National Association of Medical Staff Services (NAMSS). This service will be available to current clients as well as providers and hospitals with credentialing needs. A full time accountant is on staff to monitor processes and cash flow for clients. Marketing and advertising staff are also available to practices.

Vaught, Inc. provides a variety of services to healthcare organizations including remote data entry pharmacy services under product names such as NightWatch and DayBreak and prescription management services through the Hospice Rx Network. Vaught, Inc. currently employs 29 employees and are looking at future expansion opportunities in software development and additional healthcare related services. For more information about MedMatrix Solutions or any other of the Vaught, Inc. services, contact Daniel Keaton, Director of Business Development and Client Services at 304.929.6909 or visit [www.vaughtinc.com](http://www.vaughtinc.com).
