MedMatrix Solutions announces strategic partnership with Professional Medical Transcription, Inc.

Beckley, WV, November 1, 2011 — MedMatrix Solutions, a wholly-owned subsidiary of Vaught, Inc., has entered into a strategic partnership with Professional Medical Transcription, Inc. a medical transcription and coding service based in Aiken, South Carolina. The partnership allows both companies to offer an expanded list of services to their clients.

MedMatrix Solutions offers complete billing, practice management, consulting and marketing services for medical professionals. MedMatrix Solutions currently manages over \$25 million in billing revenue for medical professionals in southern West Virginia and Virginia.

“We are excited to partner with PMT,” says Christopher R. Vaught, President & CEO of Vaught, Inc. “PMT has a great reputation for providing quality transcription and coding services. Because our clients are asking for these services, it is a logical fit.”

While based in Aiken, South Carolina, PMT has an established customer base in West Virginia and surrounding states. PMT was founded in 1989 as a medical transcription service and recently added inpatient and outpatient coding.

“Our goal as a 100% HIPAA compliant service bureau is to provide medical facilities with superior quality transcription and coding services,” says Nicky Burgess, president of Professional Medical Transcription. “MedMatrix Solutions provides a wide variety of features to offer to our clients. We are confident that MedMatrix Solutions will present our clients the same high level of service they present their clients.”

“It’s a win for both of us,” says Tina Payne, Director of MedMatrix Solutions. “Both MedMatrix Solutions and PMT clients will benefit from the expertise brought to the relationship by each company.”
